## SUMMARY

Dynamic Frontend Developer proficient in React.js, JavaScript, HTML, CSS, Tailwind CSS, and responsive design principles. Excited to contribute innovative ideas and technical skills to develop captivating web interfaces. Eager learner and collaborative team player ready to make an impact.

## SKILLS

React.js JavaScript HTML CSS Tailwind CSS Git & GitHub Python

## PROJECTS

### Crypto-Currency Web App [Demo](#)

Built a React-based cryptocurrency trading platform showcasing real-time market data for the top 50 cryptocurrencies. Integrated a newsfeed for the latest cryptocurrency updates. Implemented React Router for navigation and ensured full responsiveness across devices.

- **Real-time Market Data:** Displayed real-time market data for the top 50 cryptocurrencies, providing users with up-to-date information for informed trading decisions.
- **Latest News:** Integrated a news feed to showcase the latest news related to cryptocurrencies, keeping users informed about market trends and developments.
- **API Integration:** Leveraged cryptocurrency APIs for real-time market data and news updates.
- **Upcoming Exchange Rates Feature:** Planned and implemented an exchange-rates feature to provide users with additional trading insights (feature currently in development).
- **React Router Navigation:** Utilized React Router for smooth navigation between different tabs and sections of the platform, enhancing user accessibility.
- **Full Responsiveness:** Ensured full responsiveness of the platform, allowing users to access and use the application seamlessly across various devices.
- **Technologies Used:** React.js, React Router, Tailwind CSS

### To-Do List [Demo](#)

The application enables users to efficiently manage tasks with features including task addition, editing, deletion, task completion tracking, and due dates.

- **Task Management:** Implemented functionalities for adding, editing, and deleting tasks to enhance user productivity.
- **Task Completion:** Integrated checkmarks for users to mark tasks as completed, offering visual feedback on task progress.
- **Due Dates:** Implemented due date functionality to help users prioritize their workload effectively.
- **Data Persistence:** Utilized local storage of the browser to store task data, ensuring persistence across sessions.
- **Responsive Design:** Ensured a seamless user experience across various devices through Tailwind CSS for styling and responsive design principles.
- **Technologies Used:** JavaScript, Tailwind CSS, HTML

### Currency Converter [Demo](#)

Currency Converter is a simple React application that allows users to convert currencies based on real-time exchange rates. It utilizes the Currency Converter Pro API to fetch exchange rate data and provides a user-friendly interface for currency conversion.

- **Currency Conversion:** Allows conversion between over 160 currencies, providing users with flexibility in monetary transactions.
- **Dynamic Flag Display:** Implemented dynamic flag display, with the flag changing to represent the selected country, enhancing visual feedback.
- **Responsive Design:** Ensured seamless user experience across devices in the currency converter application.
- **Technologies Used:** React.js, Tailwind CSS, JavaScript

## EDUCATION

### Bachelors of Engineering - Computer Science Engineering

CMR Institute of Technology, Bengaluru

2019 - 2023
