SUMMARY

Dynamic Frontend Developer proficient in React.js, JavaScript, HTML, CSS, Tailwind CSS, and responsive design principles. Excited to contribute innovative ideas and technical skills to develop captivating web interfaces. Eager learner and collaborative team player ready to make an impact.

SKILLS

React.js   JavaScript   HTML   CSS   Tailwind CSS   Git & GitHub   Python

Experience

Frontend Developer Intern
Unified Mentor Private Limited
15/03/2024 - /15/04/2024

- Collaborated on various web development projects using React.js, HTML, CSS, Tailwind CSS and JavaScript.
- Utilized React components and state management to efficiently handle data and create dynamic web applications.
- Implemented React Router for seamless navigation and routing within the web applications.
- Worked closely with the team to integrate RESTful APIs and consume data in React components.

PROJECTS

Crypto-Currency Web App 🔗 Demo

Built a React-based cryptocurrency trading platform showcasing real-time market data for the top 50 cryptocurrencies.

- **Real-time Market Data:** Displayed real-time market data for the top 50 cryptocurrencies, providing users with up-to-date information for informed trading decisions.
- **Latest News:** Integrated a news feed to showcase the latest news related to cryptocurrencies, keeping users informed about market trends and developments.
- **API Integration:** Leveraged cryptocurrency APIs for real-time market data and news updates
- **React Router Navigation:** Utilized React Router for smooth navigation between different tabs and sections of the platform, enhancing user accessibility.
- **Technologies Used:** React.js, React Router, Tailwind CSS

To-Do List 🔗 Demo

The application enables users to efficiently manage tasks with features including task addition, editing, deletion, task completion tracking and due dates.

- **Task Completion:** Integrated checkmarks for users to mark tasks as completed, offering visual feedback on task progress.
- **Data Persistence:** Utilized local storage of the browser to store task data, ensuring persistence across sessions.
- **Technologies Used:** JavaScript, Tailwind CSS, HTML

Tic-Tac-Toe Game 🔗 Demo

This entertaining game of tic tac toe that allows two players to take turns marking spaces in a 3x3 grid. Track's the game state to determine when a player wins or when the game ends in a draw. Provides sound effects for player turns, winning, and drawing.

- **Technologies Used:** React.js, Tailwind CSS

Currency Converter 🔗 Demo

Currency Converter is a simple React application that allows users to convert over 160 currencies based on real-time exchange rates. It utilizes the Currency Converter Pro API to fetch exchange rate data and provides a user-friendly interface for currency conversion.

- **Technologies Used:** React.js, Tailwind CSS.

EDUCATION

Bachelors of Engineering – Computer Science Engineering

CMR Institute of Technology, Bengaluru
📅 2019 - 2023
